Foreword ..... *xiii*

About the Author ..... *xv*

About the Technical Reviewers ..... *xvii*

Acknowledgments ..... *xix*

Introduction ..... *xxi*

What This Book Covers ..... *xx*
Who This Book Is For ..... *xxii*
Downloading the Application Code ..... *xxiii*

Chapter 1 Understanding Application Architecture: An Overview *1*

Introducing Single-Tier Architecture *2*
Introducing Two-Tier Architecture *2*
Introducing N-Tier Architecture *6*
Understanding Application Layers *7*
Developing Enterprise Applications with .NET *15*
Summary *22*

Chapter 2 Building an N-Tier Application *23*

Making Design Choices *23*
Setting Up IIS *25*
Setting Up the Microsoft .NET IDE *35*
Summary *42*

Chapter 3 Creating the Application Infrastructure 43

Designing the Physical Application Architecture 43
Creating the Shared Objects 54
Creating the Stored Procedures 57
Creating the Data-Centric Object 60
Creating the User-Centric Business Objects 67
Creating Collection Classes 77
Creating the User Interface 85
Adding Some Basic Functionality 95
Summary 121

Chapter 4 Handling Errors with Class 123

Understanding Visual Basic 6 Error Handling Structures 123
Understanding VB .NET Error Handling Structure 124
Using the .NET Exception Class 126
Determining What Happened 127
Storing Error Information 127
Setting Up the Database 129
Creating the LogError Classes 130
Handling Errors in the Northwind Application 149
Summary 157

Chapter 5 Building Business Objects 159

Exploring Business Rule Types 159
Reporting Business Rule Violations 160
Creating Your First Rule 161
Working with .NET Exception Classes 161
Creating the Error Classes 164
Creating the BusinessErrors Class 165
Adding Business Rules to the Data-Centric Object 166
Adding Business Rules to the User-Centric Object 171
Displaying Business Rules to the User 180
Responding to Object Changes in the User Interface 186
Handling Edit Cancellations 191
Summary 193

Chapter 6 Creating the Windows User Interface 195

Building a Dynamic Menu Structure 196
Implementing Cut, Copy, and Paste Functionality 212
Implementing Select All Functionality 217
Implementing Find Functionality 218
Adding a Toolbar 222
Implementing a StatusBar 225
Summary 235

Chapter 7 Revisiting Objects and Rules 237

Determining Object Relationships 238
Building the Territory Classes 240
Creating the Territory User Interface 258
Summary 271

Chapter 8 Reusing Code 273

Reducing Redundant Code 273
Consolidating the User-Centric Classes 276
Adding a Configuration File 282
Creating Enterprise Templates 284
Summary 306

Chapter 9 Understanding Server-Side Business Rules 307

Creating the Employee Stored Procedures 308
Determining the Business Rules 314
Building the Employee Objects 316
Testing the Employee Maintenance Function 400
Summary 402

Chapter 10 Using Reflection 403

Understanding Attribute Classes 404
Setting Up the Scenario 405
Setting Up the Project 406
Creating the Attribute Class 407
Creating the ComputerList Class 408
Examining Property Attributes in Code 410
Implementing Business Rules Using Custom Attributes 420
Summary 437

Chapter 11 Implementing Web Services and the UDDI . 439

What Are Web Services? 439
Setting Up a Web Service Project 441
Creating the GetAllEmployees Web Service 444
Invoking a Web Service with Internet Explorer 446
Creating the GetEmployeeDetails Web Service 448
Consuming a Web Service 452
Using the WSDL Utility 465
Using .NET Server 2003 UDDI 467
Accessing the UDDI Programmatically 474
Summary 484

Chapter 12 Creating a Web Forms Interface 485

Targeting Corporate Intranets 485
Targeting Corporate Extranets 485
Setting Up the Application 487
Accessing the Database 497
Building the Logon Page 503
Creating the Employee List Page 508
Updating the Employee List Web Page 510
Creating the Employee Details Page 513
Referencing Your Objects Directly 517
Implementing Editing Capabilities 523
Summary 539

Chapter 13 Globalizing and Localizing Your Application 541

Introducing Globalization 542
Exploring Resource Creation Tools 544
Exploring Languages Supported by the .NET Framework 548
Building the NorthwindTraders Resource Files 550
Creating the Satellite Assemblies 554
Accessing Cultural Information in Code 555
Localizing ASP.NET Applications 558
Summary 563

Appendix A Adding Support for Unicode Characters 565

Appendix B Recommended Reading 571

Remoting 571
Object-Oriented Design/UML 571
Security 571
ADO.NET/Databases 572
Design Patterns 572
Regular Expressions 572
Globalization and Localization 572
Business Rules 572
.NET Framework (Intermediate Language) 572
Visual Basic .NET Primer 573
Web Services and UDDI 573
General .NET Web Sites 573

Index 575
